

# Laminine

THE SYMBOL OF LIFE & RENEWAL

**YES** perfect health is not impossible to find. In fact, it's closer than you think. A healthy new you is on its way, and it starts with Laminine. This miraculous breakthrough began with the discovery of a potent, natural extract by a Canadian doctor who used it to support normal cell structure and function for those concerned with cancer.

Today, Laminine continues an 80-year tradition of support for healing and returning the body to a balanced state.

## THE ORIGIN

In 1929, John R. Davidson, a Canadian Doctor, discovered an extract derived from fertilized hen eggs at a critical stage of incubation. Dr. Davidson used this extract to restore health in his patients.

Scientists have since discovered that on exactly the ninth day of incubation, the fertilized hen egg contains all of the necessary elements to create life and the highest amount of nutrition to develop it into a living being. At this very precise moment, the highly potent tissue is extracted.

Today, along with a blend of phyto and marine proteins and the addition of amino acids, we have created Laminine. Laminine continues the tradition of healing and sustaining a balanced state in your life.

### WHAT IS LAMININE?

Laminine® helps regenerate aging cells and nourish unhealthy cells, supporting restoration to their original state. Your body has its own repair mechanism, the physical ability to regenerate your own damaged cells. This repair mechanism is alive and well when we were younger, but falters as we age.

Laminine unleashes this powerful repair mechanism inside all of us. It can bring physical, mental and emotional health to a new level.

### HOW IT WORKS

Have you ever wondered how a child physically develops at a dramatic rate? How a young person can exert so much energy and recover almost instantly? Have you ever noticed how a child is able to pick up new languages so quickly and how they remember the slightest things?

The answer lies in a compound that is essential in supporting embryonic development called Fibroblast Growth Factor (FGF). While FGF is readily available in the human placenta, its availability diminishes over time and essentially vanishes as we age. Our body by itself is incapable of producing its own FGF, which it must derive from the food supply.

Until now...

All-natural laminine is believed to be the only known source of FGF in adults. Research credits FGF with improving neuron functions in your brain, increasing amino acids and peptides in your cells and assigning the proper stem cells to restore your body's organs back to their original state. In laymen terms, the FGF reprograms adult stem cells and amino acids in your body, which make up your natural repair tools to travel to the areas that need it the most. Once there, these repair tools have the ability to integrate themselves with that particular body part. Their mission then becomes to repair and regenerate the cells and tissue in that location, wherever it is in the body.

As long as the FGF is there, our body's repair mechanisms can be instructed to facilitate in the repair of the part of our body that needs the most rehabilitation. This explains why Laminine has demonstrated a wide range of benefits for individuals in varying parts of the body.

## REAL LIFE TESTIMONIALS

Ever since my mother died about six months ago, I couldn't sleep as I experienced a deep sadness. After Laminine, I slept soundly for the first time and noticed my bouts of sadness gradually disappear. I have a great sense of well-being.

Since giving my children Laminine, we have seen improvements in all four of our children. They have noticed their stamina was better, their performance in sports improved, they have more energy and most importantly, more focus. We've watched them excel not only in their sports but also with their grades. My kids love the product, and so do I!
